## CAREER OBJECTIVE

A motivated and results driven graduate with a Bachelor of Science in Applied Statistics with Computing, Skilled in UX/UI design, user research, wireframing, prototyping, Figma, design documentation, and data driven problem solving. Passionate about building intuitive financial products and collaborating with cross functional teams

## PORTFOLIO PROJECT

### M-Pesa Statement Analysis Tool for Credit Assessment

Designed a fintech application that enables financial institutions to analyse M-Pesa statements when assessing loan applications.

- Conducted user research to understand workflows and challenges faced by credit officers.
- Designed user journeys for statement upload, transaction analysis, credit insights, and loan recommendation workflows.
- Created wireframes and interactive prototypes.
- Designed dashboards displaying income analysis, expenditure analysis, cash flow, transaction categories, risk factors, and financial behaviour indicators.
- Produced design specifications, user flows, and developer handoff documentation.
- Applied user centred design principles to improve usability and reduce analysis time.
